

- ❖ Choice for color: SteelBlue is easy on the eyes and has a slight connection with rain.
- ❖ Choice for the text: Calibri, 14px is good readable.
- ❖ Choice for the axes: no more than necessary.
- ❖ Choice for the color change: too much rain is bad, so the higher the bar, how more the color red is added.
- ❖ Choice for the animation: when loaded, the bars fill themselves up, just like rain fills a bucket.
